An HR business partner is configuring a new Project for recurring policy questions from managers. The Project will be used across many chats by several HR team members.

Which content belongs in the Project knowledge base?

- ☐ A. the current employee handbook plus prior versions of the handbook going back five years, so Claude can answer questions about how policies have changed 
- ☐ B. the current employee handbook only, with the leveling guide and the policies-FAQ attached at the start of each chat as needed for that chat's topic 
- ☐ C. the current employee handbook, the leveling guide, the policies-FAQ, and every email the HR team has sent about policy in the past year, for additional context 
- ☒ D. the current employee handbook, the leveling guide, and the policies-FAQ document referenced across the Project's chats

A project manager is transforming a Claude-generated draft into a polished board memo. The board reads the memo before the meeting and expects it to be scannable, factually verified, and consistent with the organization's standard terminology.

Which set of refinements is most appropriate?

- ☐ A. Tighten wording for executive scannability and verify each fact against source data; leave heading structure and terminology as written to preserve the draft's voice. 
- ☒ B. Apply consistent headings, tighten wording for executive scannability, align terminology with the organization's standards, and verify each fact against source data. 
- ☐ C. Apply consistent headings, expand each section to give the board full context, and align terminology with the organization's standards. 
- ☐ D. Apply consistent headings and align terminology with the organization's standards; rely on Claude's verification of facts, since the draft was generated from the source data.

You are a marketing manager using Claude to ideate concepts for a campaign and must complete the framing steps before generating concepts.

Which two framing steps must be completed **BEFORE** asking Claude to generate concepts? (Select two.)

Each correct answer presents part of the solution.

- ☐ A. Select a finalist concept and prepare it for stakeholder approval. 
- ☐ B. Review the Claude-generated concepts and select the two strongest for further development. 
- ☐ C. Schedule the campaign launch and the rollout dates with the agency. 
- ☒ D. Define the goal of the campaign and the success metrics for the campaign. 
- ☒ E. Define the brand voice and the audience the concepts will speak to.

You are a project manager at Orinexa, Inc. You are picking a Claude model for a new production workload and must complete the requirements steps before testing candidates.

Which two steps must be completed **BEFORE** testing candidate models on a representative sample? (Select two.)

Each correct answer presents part of the solution.

☐ A. Promote the selected model to production traffic for the workload. 

☒ B. Define the quality bar, the latency tolerance, and the expected request volume. 

☐ C. Sign off on the production rollout plan with the platform and security teams. 

☐ D. Retest the selected model whenever a new model version is released. 

☒ E. Choose a candidate model based on the requirements profile and known capabilities.

Flag for Review

A Claude associate is evaluating whether to enable a Skill that was provided by an unfamiliar third party.

Which two checks best support a sound trust decision? (Select two.)

- ☐ A. Treat the Skill's appearance in a public listing as sufficient validation, without confirming the source, the requested permissions, or alignment with the organization's approved-Skill list. 
- ☐ B. Skip permission review on the assumption that the Skill cannot exceed the boundaries of the workflow, even though Skills can request access that the task does not require. 
- ☐ C. Enable the Skill immediately on the basis of strong external reviews, even though the source has not been validated against the organization's approved-Skill list and the permissions remain unverified. 
- ☒ D. Verify the source of the Skill against the organization's approved-Skill list before enabling it within claude.ai or any Project the team uses for its work. 
- ☒ E. Review the permissions and capabilities the Skill requests and confirm that the requested access is appropriate for the task the Skill is intended to perform. 

Question 6 of 60

Mark for Comment

Flag for Review

You are an operations manager preparing a quick reference card for a team.

Which description correctly characterizes the three Claude model tiers in general terms?

- ☐ A. Haiku is the most capable model for the deepest reasoning, while Opus is the lightweight model for quick replies. 
- ☐ B. All three models offer the same reasoning depth and differ only in response speed and cost. 
- ☒ C. Haiku is fast and lightweight, Sonnet is the balanced default for most everyday work, and Opus is the most capable for complex reasoning at higher latency and cost. 
- ☐ D. Sonnet is the fastest of the three models because its architecture is optimized for speed rather than reasoning depth. 

Question 7 of 60

Mark for Comment

Flag for Review

You are an operations lead mapping production tasks to Claude model strengths to set realistic expectations.

Which two production tasks fit Claude's strengths most clearly? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. monitoring a live sensor data stream and flagging anomalies as they occur in real time 
- ☐ B. calculating the precise settlement value of a derivative contract using live market inputs 
- ☒ C. synthesizing a single executive summary across many long source documents 
- ☒ D. drafting a tone-and-audience-aware customer-facing email under human review 
- ☐ E. issuing a binding legal determination based solely on Claude's analysis of case documents 

Question 8 of 60

Mark for Comment

Flag for Review

A finance manager must select a Claude feature for a task that requires deterministic calculations across a multi-tab spreadsheet.

Which selection best fits the requirement?

- ☐ A. Use an Artifact alone for the calculations, which provides a stable editable surface for the result but does not perform the deterministic computation that Code Execution would run. 
- ☒ B. Use Code Execution, which runs code in a sandbox to perform calculations on the uploaded file and produce verified outputs the associate can check. 
- ☐ C. Use the Research feature for the calculations, which gathers and synthesizes external sources and is not the appropriate feature for deterministic computation on an uploaded spreadsheet. 
- ☐ D. Use a standard chat prompt for the calculations, which generates text without running code and does not produce the verified deterministic output the multi-tab calculation task requires. 

Question 9 of 60

Mark for Comment

Flag for Review

An analyst has been asked to compute summary statistics from an uploaded sales data file and produce a chart for a weekly report.

Which output approach best fits the task?

- ☐ A. Request a narrative description of the data in the chat response without computing values, leaving the summary statistics and the chart unproduced and the weekly report incomplete. 
- ☒ B. Use Code Execution to perform the calculations and generate the chart, then verify the computed results against the source data before sharing the output. 
- ☐ C. Produce a written placeholder for the chart in the chat response without generating the actual visualization, leaving the weekly report without the visual output it requires. 
- ☐ D. Ask Claude to estimate the summary statistics from a brief preview of the file, accepting unverified figures rather than running the calculations against the full uploaded dataset. 

Question 10 of 60

Mark for Comment

Flag for Review

You are sorting Claude output structural defects by which most undermines clarity.

Which structural defect most severely undermines the clarity of the output?

- ☐ A. A single subheading is shorter than the other subheadings in the document. 
- ☐ B. Two adjacent paragraphs present the same information using inconsistent terminology. 
- ☒ C. The main conclusion contradicts the evidence presented in the body. 
- ☐ D. Typographic inconsistencies appear throughout multiple sections of the document. 

Question 11 of 60

Mark for Comment

Flag for Review

You are a knowledge worker reviewing a Claude-generated brief that asserts a "well-known industry standard" without naming any source.

How should this assertion be handled?

- ☐ A. Republish the brief unchanged because the claim sounds authoritative. 
- ☐ B. Accept the assertion because the phrase "well-known" is reassuring. 
- ☒ C. Treat the assertion as unverified, and either source it from an authoritative reference or remove it. 
- ☐ D. Strengthen the assertion by adding more confident wording. 

Question 12 of 60

Mark for Comment

Flag for Review

You are an HR specialist reviewing data items proposed for inclusion in a Claude prompt.

Which two data items are appropriate to include in a Claude prompt for a routine task? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. a compensation band summary that includes employee names and current salary figures for a specific team 
- ☒ B. a redacted job description that the model will adapt for a posting 
- ☐ C. employee ID numbers and hire dates for the team roster included to help Claude personalize onboarding communications 
- ☒ D. an anonymized summary of an HR policy that the model will rephrase 
- ☐ E. accommodation request notes from an employee's HR file needed to draft a role adjustment memo 

Question 14 of 60

Mark for Comment

Flag for Review

A knowledge worker is explaining how to use feedback to improve Claude-supported work over time.

Which description is most accurate?

- ☐ A. Capture feedback as an aggregate quality score per run, since aggregate scores show whether quality is improving without requiring detail on individual issues. 
- ☐ B. Capture feedback only after several runs so patterns emerge from the volume of observations, then apply changes based on the patterns rather than any single run. 
- ☐ C. Capture general impressions after each run and apply them as broad prompt rewrites, since broad rewrites cover more potential issues than targeted changes. 
- ☒ D. Capture specific feedback after each run, translate it into targeted prompt or workflow changes, and observe whether subsequent runs improve. 

Question 15 of 60

Mark for Comment

Flag for Review

You are an HR specialist reviewing model choices made by colleagues for various tasks.

Which two model choices represent appropriate matches between the model and the task? (Select two.)

Each correct answer presents a complete solution.

- ☒ A. a lighter, faster model for routine FAQ-style replies under tight latency budgets 
- ☐ B. a higher-capability model for one-line keyword extraction at high request volume 
- ☒ C. a higher-capability model for complex multi-step legal reasoning under review 
- ☐ D. a higher-capability model selected solely because it is the most expensive option 
- ☐ E. a lighter, faster model for nuanced multi-document strategic synthesis 

Question 16 of 60

Mark for Comment

Flag for Review

You are a customer-success manager considering whether to escalate a Claude-generated response.

Which factor most strongly raises the impact of the output and supports escalation before external use?

- ☐ A. The response is a brief internal announcement about an upcoming team all-hands meeting. 
- ☐ B. The response is a casual rephrasing of an internal team status update. 
- ☐ C. The response is an internal draft summarizing the associate's notes from a customer call for their own reference. 
- ☒ D. The response is an unchanged draft for a paying customer that includes a service-level commitment. 

Question 17 of 60

Flag for Review

An HR business partner is configuring two separate Projects for two distinct client engagements.

Which configuration best prevents context bleed between the two engagements?

- ☐ A. Use a single shared Project for both client engagements with combined memory, knowledge sources, and instructions, on the assumption that Claude will keep the two clients' contexts separate without configuration. 
- ☒ B. Set up each Project with its own distinct memory context, knowledge sources, and instructions, and verify that information from one Project does not appear in the other Project's responses. 
- ☐ C. Skip Project configuration entirely and use general chats for both engagements, which provides no scoped memory contexts and offers no structural separation between the two clients' work streams. 
- ☐ D. Configure both Projects to share the same memory context to reduce setup effort, even though shared memory between unrelated client engagements is precisely the configuration that produces context bleed. 

Question 18 of 60

Mark for Comment

Flag for Review

You are a business analyst reviewing prompt drafts written by teammates.

Which two elements belong in a well-structured prompt for a business task? (Select two.)

Each correct answer presents part of the solution.

- ☐ A. a comprehensive list of company products and services to provide the model with business context 
- ☒ B. a clear statement of the task that the model must perform 
- ☐ C. a short personal anecdote to make the prompt feel more conversational 
- ☒ D. relevant context such as the audience and the goal of the task 
- ☐ E. a friendly, conversational tone instruction to make responses feel more approachable 

Question 19 of 60

Flag for Review

You are using Claude to redesign an employee onboarding workflow and must complete the high-level decomposition steps before specifying detailed artifacts.

Which two decomposition steps must be completed **BEFORE** specifying exact email content and the schedule? (Select two.)

Each correct answer presents part of the solution.

- ☒ A. Define the overall objective of the onboarding experience. 
- ☐ B. Roll out the onboarding workflow to every new hire across the company. 
- ☒ C. Identify the major phases of the onboarding experience. 
- ☐ D. Pilot the onboarding workflow with a small cohort of new hires. 
- ☐ E. Negotiate the onboarding budget with the finance department. 

Question 20 of 60

Mark for Comment

Flag for Review

You are a project manager weighing workflow steps by how much leverage Claude integration provides.

Which workflow step typically offers the greatest Claude leverage in a knowledge-work team?

- ☒ A. drafting and synthesizing across many sources for a downstream reviewer 
- ☐ B. approving final deliverables for external publication without further review 
- ☐ C. negotiating contractual terms with external parties on behalf of the company 
- ☐ D. making final personnel decisions about hiring, promotion, or termination 

Question 21 of 60

Mark for Comment

Flag for Review

You are a project manager reviewing Claude usage approaches that teammates have proposed for a project workflow.

Which two workflow steps are well-suited for Claude support? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. deciding promotion outcomes for staff based solely on the model's judgment 
- ☒ B. synthesizing a literature review across many uploaded research documents 
- ☐ C. issuing legally binding contractual commitments on behalf of the company 
- ☒ D. drafting a structured project status update from a set of meeting notes 
- ☐ E. approving a final external press release without any human review 

Question 22 of 60

Mark for Comment

Flag for Review

You are a content creator. A first response from Claude is accurate but uses inconsistent terminology that does not match your organization's glossary.

Which iterative change addresses the issue most directly?

- ☐ A. Remove the topic from the prompt to avoid the terminology issue entirely. 
- ☒ B. Provide the organization's glossary and instruct Claude to use only those terms throughout the response. 
- ☐ C. Increase the requested length so the inconsistent terminology appears more often. 
- ☐ D. Ask Claude to invent additional terms unrelated to the glossary. 

Question 23 of 60

Mark for Comment

Flag for Review

You are a product designer using Claude in a solution design exercise.

Which solution-design step should be performed first when using Claude?

- ☐ A. Compare the candidate concepts against the constraints and select a finalist. 
- ☐ B. Generate candidate solution concepts using Claude across diverse styles. 
- ☐ C. Produce detailed mock-ups of the chosen solution for stakeholder review. 
- ☒ D. Articulate the problem the solution must address and the constraints in play. 

Question 24 of 60

Mark for Comment

Flag for Review

You are a communications manager validating a Claude-generated newsletter that includes a specific industry growth figure. The figure appears in three trade-press articles, but none of them link to the underlying study.

Which validation step is correct?

- ☐ A. Accept the figure because three trade-press articles repeat it. 
- ☐ B. Remove the source attribution and present the figure as common knowledge. 
- ☒ C. Locate the original study referenced by the trade-press articles and verify the figure in the primary source. 
- ☐ D. Use the highest figure across the three articles to make the newsletter more compelling. 

Question 25 of 60

Mark for Comment

Flag for Review

A knowledge worker is explaining the purpose of an organizational AI governance framework to a colleague.

Which description is most accurate?

- ☐ A. A governance framework defines the training every employee must complete before using AI tools, with separate requirements for each tool the organization licenses. 
- ☐ B. A governance framework documents the AI policies the organization is legally required to adopt, focusing on regulatory compliance rather than day-to-day use. 
- ☐ C. A governance framework lists the AI tools the organization licenses and the cost of each, so users can pick the most cost-effective tool for each task. 
- ☒ D. A governance framework defines approved tools, allowed data, required reviews, and reporting paths so AI is used consistently and accountably. 

Question 26 of 60

Mark for Comment

Flag for Review

Before sharing a Claude-generated brief, an analyst is applying the AI Fluency Framework Discernment competency to evaluate it.

Which review best reflects Discernment principles?

- ☐ A. Skip the source material check during review and rely on overall tone and logical flow as proxies for factual accuracy. 
- ☒ B. Conduct a systematic check of the brief against the task requirements, source material, and professional standards before sharing it. 
- ☐ C. Review the opening paragraph and the conclusion of the brief, since these sections typically reflect the quality of the full document. 
- ☐ D. Accept the brief on the basis that it reads fluently and the subject matter aligns with the analyst's professional knowledge of the topic. 

Question 27 of 60

Mark for Comment

Flag for Review

An support representative is configuring a Project for drafting customer-facing apology emails after service outages. The current custom instructions tell Claude to "be empathetic and casual, keep it short, and offer a goodwill credit." The customer-service team has flagged that recent drafts have been too brief, have offered goodwill credits in cases where policy does not allow them, and have used contractions that the brand voice guide prohibits.

Which adjustment best aligns the configuration to the use case?

- ☐ A. Move the brand voice guide and the goodwill-credit policy into the Project knowledge base and rely on the documents alone to govern tone, length, and credit decisions, without changing the custom instructions. 
- ☐ B. Keep the existing instructions and add a sentence telling Claude to consult the brand voice guide and the goodwill-credit policy that are attached to the Project knowledge base. 
- ☐ C. Replace "be empathetic and casual" with "match the brand voice guide," remove the instruction to offer goodwill credits, and let each draft determine its own length based on the incident. 
- ☒ D. Specify the brand voice attributes (empathetic, formal, no contractions), set a minimum length, and instruct Claude to recommend a goodwill credit only when the attached eligibility policy permits one. 

Question 28 of 60

Mark for Comment

Flag for Review

A learning specialist is configuring a Claude Project for a recurring course-design workflow.

Which configuration approach best leverages a Skill alongside other Project elements?

- ☐ A. Add the Skill to the Project but omit the supporting knowledge sources and any custom instructions, so the Project lacks the reference content and persistent guidance the workflow requires. 
- ☐ B. Configure the Project with custom instructions that contradict the Skill's documented purpose, creating ambiguity about which guidance Claude should follow within the recurring course-design workflow. 
- ☐ C. Upload the supporting knowledge sources but disable the relevant Skill, eliminating the packaged capability the workflow needs and forcing each chat to reconstruct the procedure manually. 
- ☒ D. Add the relevant Skill to the Project, upload the supporting knowledge sources, and write custom instructions that reference both the Skill and the knowledge. 

Question 29 of 60

Mark for Comment

Flag for Review

You are a knowledge worker summarizing common prompt failure patterns for the team.

Which pattern most often produces vague or off-target output?

- ☐ A. a prompt that explicitly names the role, task, audience, and required output format 
- ☐ B. a prompt that includes a representative example of the desired output 
- ☐ C. a prompt that adds clear constraints on length and tone 
- ☒ D. a prompt that names a topic but does not state the task, audience, or required output structure 

Question 30 of 60

Mark for Comment

Flag for Review

You are an analyst fact-checking a Claude-generated report. Two cited sources give conflicting dates for the same event.

Which approach is correct?

- ☒ A. Locate a primary or authoritative source for the event and use the date that source confirms. 
- ☐ B. Publish both dates without resolving the conflict and let the reader choose. 
- ☐ C. Average the two conflicting dates and use the average. 
- ☐ D. Choose the more recent date on the basis that later sources typically reflect updated or corrected information. 

Question 31 of 60

Mark for Comment

Flag for Review

A knowledge worker is briefing a stakeholder group on Claude's limitations. The stakeholders will use Claude on customer-facing work where confident-sounding output that contains errors would cause real harm.

Which limitation is most important to communicate clearly?

- ☒ A. Claude can produce confident-sounding output that contains unsupported claims, so human review remains essential for high-impact work. 
- ☐ B. Claude's responses vary across runs of the same prompt, so stakeholders should run each prompt several times and compare outputs before using any single response. 
- ☐ C. Claude can produce long, detailed responses that take time to read, so stakeholders should request shorter outputs when working under tight deadlines. 
- ☐ D. Claude's knowledge has a training cutoff, so stakeholders must verify any time-sensitive claims against current sources before using them. 

Question 32 of 60

Mark for Comment

Flag for Review

You are reviewing claims about prompt iteration that colleagues have made in a recent training.

Which two claims about prompt iteration are accurate? (Select two.)

Each correct answer presents a complete solution.

- ☒ A. Output comparison against original criteria validates whether iteration helped. 
- ☐ B. Iteration should stop only after every possible alternative phrasing has been tried. 
- ☐ C. More iterations always produce a better output regardless of what was changed. 
- ☐ D. Repeated resubmission of the same prompt is the most reliable way to improve output. 
- ☒ E. Iteration is most productive when each change targets a specific diagnosed weakness. 

Question 33 of 60

Mark for Comment

Flag for Review

You are reviewing colleagues' responses to feedback received on Claude-drafted communications.

Which two feedback responses are productive? (Select two.)

Each correct answer presents a complete solution.

- ☒ A. mapping each piece of feedback to the specific change made in the next draft 
- ☐ B. incorporating all feedback received, including contradictory suggestions, into the next draft simultaneously 
- ☒ C. asking clarifying questions when feedback is ambiguous before acting on it 
- ☐ D. declining to revise sections that were generated by Claude on the basis that the model's output should be trusted as written 
- ☐ E. deferring all feedback to a later revision cycle to avoid disrupting the current draft's consistency 

Question 34 of 60

Mark for Comment

Flag for Review

You are evaluating a Claude output that appears to contain hallucinated content.

Which response step should be performed first when a hallucination is suspected?

- ☒ A. Pinpoint the specific claim that appears to be unsupported by available evidence. 
- ☐ B. Discard the entire output and regenerate the output with a fresh prompt. 
- ☐ C. Notify the user community that the output contains a hallucinated claim. 
- ☐ D. Document the hallucination pattern in the team's risk register for future reference. 

Question 35 of 60

Mark for Comment

Flag for Review

You are evaluating proposed workflow changes against whether they meaningfully improve the workflow.

Which two proposed changes meaningfully improve a recurring Claude workflow? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. reorganizing the workflow document's section headings to improve navigation 
- ☐ B. updating the team's shared workspace name to reflect the new workflow process 
- ☒ C. adding a quality check on outputs before they enter the downstream process 
- ☒ D. extracting the standard reference material into a Project to avoid repeating it 
- ☐ E. labelling each workflow step with descriptive names to improve readability for new team members 

Question 36 of 60

Mark for Comment

Flag for Review

You are an HR specialist sorting potential ethical risks of a Claude-supported workflow.

Which two risks pose the highest ethical concern in an HR-adjacent workflow? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. a clerical typo in a routine internal calendar invitation
- ☐ B. Inconsistent use of the company's preferred dash style across documents
- ☐ C. inconsistent tone and formatting across internal HR communications sent to employees
- ☒ D. decisions that materially affect a person's employment without human accountability
- ☒ E. outputs that systematically disadvantage members of a protected group

Question 37 of 60

☐ Mark for Comment ☐ Flag for Review

You are a project manager working through a long planning conversation with Claude and must keep the conversation productive as it grows.

Which two practices keep a long planning conversation productive? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. Avoid summarizing so the model retains every original word it has produced. 
- ☐ B. Open a new thread for every minor follow-up question to keep threads short. 
- ☒ C. Restate constraints and goals when the focus shifts to a new subtopic. 
- ☒ D. Periodically summarize decisions made so far to compress the working state. 
- ☐ E. Switch context aggressively between unrelated planning topics within one thread. 

Question 38 of 60

Mark for Comment

Flag for Review

You are a communications specialist preparing to describe Claude's role in a workflow to multiple stakeholder groups and must complete the preparation steps before drafting messages.

Which two preparation steps must be completed **BEFORE** drafting the stakeholder messages? (Select two.)

Each correct answer presents part of the solution.

- ☐ A. Archive the drafted messages in the corporate communications repository. 
- ☐ B. Schedule a follow-up forum to handle questions raised by the messages. 
- ☒ C. Identify the stakeholder groups and what each group needs to understand. 
- ☒ D. Define the key facts about Claude's role and the boundaries that apply. 
- ☐ E. Send the drafted messages out and gather feedback for revision. 

Question 39 of 60

Mark for Comment

Flag for Review

A business analyst has been asked to use Claude to extract requirements from a recorded stakeholder interview transcript. The transcript is approximately 90 minutes long and covers multiple topics.

Which approach is most likely to produce a usable structured output?

- ☒ A. Provide the transcript along with a structured prompt that requests must-haves, nice-to-haves, open questions, and conflicts as separate sections. 
- ☐ B. Provide the transcript and ask Claude to produce a single ranked list of requirements, since a single list is easier for stakeholders to review than separate sections. 
- ☐ C. Provide the transcript and ask Claude to produce a chronological list of every statement that contains a verb, then classify each statement as a requirement or not. 
- ☐ D. Provide the transcript and ask Claude to summarize it; extract requirements from the summary in a second pass since two passes catch more detail. 

Question 40 of 60

Mark for Comment

Flag for Review

A finance manager is about to discuss a confidential pre-announcement figure with Claude.

Which two settings best align with sound privacy practice for this conversation? (Select two.)

- ☒ A. Open the conversation in Incognito mode, which prevents the conversation from contributing to Memory and avoids persistent retention of the confidential pre-announcement figure across sessions. 
- ☒ B. Disable Memory contribution for the conversation if Incognito mode is not used, so the confidential figure is not retained as persistent context that could surface in later unrelated sessions. 
- ☐ C. Enable Memory contribution for the conversation so the context carries forward to support follow-up analysis in future sessions. 
- ☐ D. Treat the conversation as appropriate for default Memory settings, since the figure will only be discussed briefly and is unlikely to be retained. 
- ☐ E. Skip the privacy setting decision and proceed with default behavior, since the conversation will not explicitly instruct Claude to remember the figure. 

Question 41 of 60

Mark for Comment

Flag for Review

You are a procurement associate decomposing a vendor-evaluation task.

Which dependency ordering reflects sound sequencing?

- ☐ A. Skip criteria and ask Claude to produce a vendor recommendation from no inputs. 
- ☐ B. Rank vendors before any data is collected. 
- ☒ C. Define evaluation criteria first, gather vendor data against those criteria, then score and rank. 
- ☐ D. Score vendors first and decide on the criteria afterward. 

Question 42 of 60

Mark for Comment

Flag for Review

A knowledge worker often switches between Claude and another AI service while working on a long-running project.

Which Claude feature most directly reduces repetitive context-setting between sessions?

- ☒ A. Enable Memory and use the import capability to bring relevant context from the other AI service into Claude as a starting point for the project's work. 
- ☐ B. Rely on a single static Artifact pasted into each chat as the only continuity mechanism, ignoring the Memory feature that is purpose-built for retaining work-relevant context across sessions. 
- ☐ C. Open every Claude session in Incognito mode, which prevents the conversation from contributing to Memory and therefore eliminates the cross-session continuity the project would benefit from. 
- ☐ D. Disable Memory entirely and re-paste the same context paragraphs at the start of every Claude session, even though Memory is designed to retain that context across conversations automatically. 

Question 43 of 60

Mark for Comment

Flag for Review

You are optimizing a recurring Claude workflow and must complete the diagnostic steps before changing the workflow.

Which two diagnostic steps must be completed **BEFORE** changing the recurring workflow? (Select two.)

Each correct answer presents part of the solution.

- ☐ A. Document the revised workflow steps and update the team's standard operating procedures. 
- ☒ B. Identify the steps that contribute most to time, cost, or quality issues. 
- ☒ C. Measure the current workflow's quality, time, and cost across recent runs. 
- ☐ D. Deploy the updated workflow across the team and monitor for adoption issues. 
- ☐ E. Notify executive leadership of the projected savings from the optimization. 

Question 44 of 60

Mark for Comment

Flag for Review

You are reviewing Connector setups that colleagues have proposed for various tasks.

Which two Connector setups represent safe and appropriate uses? (Select two.)

Each correct answer presents a complete solution.

- ☐ A. a Connector that links to the payroll system to allow team members to submit expense reports directly 
- ☐ B. a Connector that links to the personnel-records system for team leads to support scheduling tasks 
- ☐ C. a Connector that links to a personal cloud storage account where team members store working drafts alongside personal files 
- ☒ D. a Connector that links to the team's project management workspace under approved scope 
- ☒ E. a read-only Connector that links to the public knowledge base for reference content 

Question 45 of 60

Mark for Comment

Flag for Review

You are a process consultant integrating Claude into an existing weekly workflow.

Which is the correct order of integration steps?

- (1) Pilot the integrated workflow with a small group and gather feedback.
- (2) Document the current workflow steps, owners, and decision points.
- (3) Update the documented workflow and roll it out to the broader team.
- (4) Identify the steps where Claude can augment work and where humans must remain.
- (5) Define the inputs Claude needs, the outputs Claude returns, and the hand-offs around each step.

☐ A. 1, 2, 4, 5, 3 

☐ B. 2, 5, 4, 1, 3 

☐ C. 4, 2, 5, 1, 3 

☒ D. 2, 4, 5, 1, 3

A Claude associate is evaluating a proposed use case in which Claude would issue final hiring decisions without any human review, applying the AI Fluency Framework Delegation competency.

Which classification best reflects Delegation principles?

- ☐ A. Appropriate with light human review applied only to a sample of decisions, even though Delegation criteria reserve final hiring decisions for human ownership rather than sample-based oversight after the fact. 
- ☐ B. Appropriate for full AI delegation, on the basis that processing speed outweighs the human judgment, accountability, and consequence considerations that Delegation criteria require for final hiring decisions. 
- ☒ C. Inappropriate for full AI delegation, because hiring decisions involve human judgment, accountability, and consequences that Delegation criteria reserve for human ownership rather than autonomous AI execution. 
- ☐ D. Inappropriate only because of system reliability concerns rather than accountability, even though Delegation criteria classify final hiring decisions as requiring human ownership regardless of system performance.

You are an analyst reviewing a Claude response that addresses two of three required questions and skips the third.

Which prompt element most likely needs strengthening?

- ☐ A. The output format should be revised to allow Claude to determine the appropriate structure for each question's answer. 
- ☒ B. The task statement should explicitly enumerate the three required questions and require an answer to each. 
- ☐ C. The role assigned to Claude should be changed to a more specialized expert persona to increase response depth. 
- ☐ D. The context provided to Claude should be expanded with additional background detail about the subject matter.

An HR team member is reviewing a Claude-drafted set of interview questions intended for use across all candidates for a single role. The questions will be asked in the same order to every candidate.

Which review practice best supports fairness?

- ☐ A. Review the questions and rotate the order across candidates so no candidate is consistently asked the hardest questions first. 
- ☒ B. Review the questions to ensure they apply equally to all candidates, avoid assumptions about candidate backgrounds, and focus on the role's actual requirements. 
- ☐ C. Review the questions for length and tone, since the questions Claude drafts are well-aligned to role requirements by default and need only stylistic adjustment. 
- ☐ D. Review the questions and add follow-up questions tailored to each candidate's resume so each interview can explore the candidate's specific experience.

You are a knowledge worker preparing inputs for a Claude prompt.

Which data type most clearly requires extra handling such as redaction or anonymization before being included in the prompt?

- ☒ A. customer government identifiers and full payment-card numbers tied to named individuals 
- ☐ B. generic product descriptions available on the company's marketing site 
- ☐ C. job titles taken from the company's public organizational chart 
- ☐ D. public press releases the company has already published

You are writing system-level instructions for a Project that supports recurring writing tasks.

Which step should be performed first when writing the system-level instructions?

- ☐ A. Validate the drafted instructions against representative requests for the Project. 
- ☒ B. Define the purpose of the Project and the boundaries the instructions must respect. 
- ☐ C. Refine the drafted instructions based on observed gaps from validation runs. 
- ☐ D. Distribute the finalized instructions to collaborators on the Project.

An HR associate is preparing to use Claude on a sensitive personnel matter. The organization's AI policy explicitly states that information related to ongoing investigations must not be entered into AI tools.

Which response best aligns with the policy?

- ☐ A. Enter the investigation-related information into Claude only after the investigation closes, since the policy applies during the investigation period. 
- ☐ B. Enter the investigation-related information into Claude in an Incognito chat, since Incognito chats do not retain information and therefore fall outside the policy's intent. 
- ☒ C. Refrain from entering investigation-related information into Claude and consult HR leadership for an approved alternative way to handle the matter. 
- ☐ D. Enter a paraphrased version of the investigation-related information that removes identifying details, since paraphrasing addresses the spirit of the policy.

A knowledge worker is iterating a prompt that has produced a partly acceptable response.

Which refinement practice produces the strongest learning across iterations?

- ☒ A. Change one identifiable element per iteration, capture the change and its effect, and adjust another element only after the first is settled. 
- ☐ B. Make several related changes in one iteration when they target the same weakness, and revert the whole set if the combined change makes the output worse. 
- ☐ C. Address every weakness the response showed in a single revision, then compare the revised output against the prior version. 
- ☐ D. Restart from a fresh prompt each iteration so that prior wording does not bias the next attempt, and pick the strongest response at the end.

An operations assistant is using Claude to support process optimization for an existing intake workflow. The assistant has access to the current process documentation and recent cycle-time data.

Which activity best uses Claude to support this process optimization task?

- ☐ A. Generate an optimized version of the intake process based on industry benchmarks, then compare it to the current process to identify gaps. 
- ☒ B. Map the current intake process, identify likely bottlenecks based on the cycle-time data, and propose optimization options for human review. 
- ☐ C. Use Claude to interview each team member who works on the intake process and synthesize the interview output into a redesigned workflow. 
- ☐ D. Apply Claude to predict the cycle-time impact of each proposed change and rank them so the team can implement improvements in priority order.

You are reviewing a Claude-generated report whose tone is confident throughout.

Which question best separates plausibility from verification?

- ☒ A. Can each specific claim be traced to a credible source or to the supplied input material? 
- ☐ B. Does the response open with a clear, well-framed statement of the main finding? 
- ☐ C. Does the response use varied sentence structure across sections? 
- ☐ D. Does the response cover the topic comprehensively based on its length and section count?

You have iterated a Claude prompt eight times, and the output quality has plateaued for the last four attempts.

Which conclusion is most appropriate?

- ☐ A. Iteration should continue indefinitely because more attempts always improve quality. 
- ☐ B. Iteration should stop and the current output should be accepted as-is regardless of remaining issues. 
- ☒ C. Iteration has reached diminishing returns and the next step is human review or a different approach. 
- ☐ D. Iteration should stop and the task should be abandoned without communicating to stakeholders.

Preparing an AI-assisted work product for external delivery, a senior manager is applying the AI Fluency Framework Diligence competency.

Which step best reflects Diligence principles?

- ☐ A. Deliver the work product without independent verification on the basis that AI assistance shifts accountability away from the human, even though Diligence holds the human fully accountable for the output. 
- ☐ B. Skip verification of any element on the assumption that fluent output implies accuracy, even though Diligence requires the human to verify and correct AI-assisted outputs before they are acted upon. 
- ☒ C. Identify the elements of the work product that must be independently verified or corrected before delivery, and take ownership of those verifications as a professional accountability obligation. 
- ☐ D. Delegate accountability for the AI-assisted work product to Claude itself rather than retaining it as a human obligation, contrary to the Diligence principle that humans remain accountable for AI-assisted outputs.

A business analyst is converting a sticky-note request from a stakeholder into a structured prompt for Claude.

Which is the correct order of conversion steps?

- (1) Confirm the audience and the decision the response must support.
- (2) Submit the structured prompt to Claude.
- (3) Identify the underlying task hidden in the sticky-note language.
- (4) Specify the desired length, tone, and output format.
- (5) Add the supporting facts and constraints relevant to the task.

☐ A. 3, 5, 1, 4, 2 

☐ B. 1, 3, 5, 4, 2 

☒ C. 3, 1, 5, 4, 2 

☐ D. 2, 3, 1, 5, 4

A finance consultant is adapting a Claude-generated narrative for a quarterly investor update. Investors have a fixed time window for the call and expect the headline result and forward outlook to be clear early.

Which adaptation is most appropriate for this audience?

- ☒ A. Lead with the headline result, present the key drivers concisely, and close with the forward outlook. 
- ☐ B. Lead with the quarter's operational highlights, present the financial result in the middle for context, and close with the forward outlook. 
- ☐ C. Lead with the forward outlook, since investors are most interested in what comes next, and present the headline result and drivers afterward. 
- ☐ D. Lead with a chronological recap of the quarter's events, present the headline result at the natural end of the recap, and conclude with the forward outlook.

You received a vague request to "look at our pricing." After discovery, the goal is confirmed: produce a structured competitor-pricing summary the team can act on, not new pricing ideas.

Which strategy best fits the clarified task?

- ☒ A. Use a research strategy that gathers structured information about competitor pricing, names sources, and notes confidence in each finding. 
- ☐ B. Use a comparative analysis strategy that contrasts the company's pricing against a single named competitor, since pairwise comparison produces the clearest output. 
- ☐ C. Use a divergent brainstorming approach to generate a wide range of possible competitor-pricing observations, then narrow to the most likely ones. 
- ☐ D. Use an open conversational strategy that explores competitor pricing iteratively across several prompts, allowing the structure to emerge from the conversation.

You are reviewing items proposed for inclusion in a Project that supports policy summaries.

Which two items are appropriate to include in the Project? (Select two.)

Each correct answer presents part of the solution.

- ☐ A. presentation slides from a recent team training session on internal communication standards 
- ☒ B. the current policy library that the summaries are drawn from 
- ☒ C. the summary format and the audience expectations the summaries must meet 
- ☐ D. active client case files maintained by a separate legal team for a different workstream 
- ☐ E. employee onboarding records used in a separate HR workflow managed by the same team 

EXAM: Claude Certified Associate Foundations

This report shows the percentage of items in each section you answered correctly for the Claude Certified Associate Foundations

PASSING SCORE: 720

YOUR SCORE: 1000

GRADE: Pass

TEST OBJECTIVES	PERCENT CORRECT
Create effective prompts for business and technical tasks	100%
Apply task decomposition techniques to structure complex requests	100%
Iterate prompts to improve output quality	100%
Adapt prompting strategies based on task type (e.g., analysis, research, drafting, brainstorming)	100%
Evaluate Claude-generated outputs for accuracy and completeness	100%
Identify hallucinations, inconsistencies, and biases in responses	100%
